Dear Sir:

The Examiner's reasons for Allowance state that the prior art fails to teach a combination of all the claimed features as presented in the Allowed Claims. Applicants agree with this characterization. However, applicants do not agree that every one of the particular features or elements recited in the Reasons for Allowance are required in a single claim. Accordingly, to the extent that the Examiner's Reasons for Allowance suggest that every one of the elements recited in the Reasons for Allowance are required for patentability of any one claim that does not explicitly recite each of those elements, applicants object to the Reasons for Allowance.

Respectfully submitted,

SHERIDAN ROSS P.C.
